

Subject: **Clutch Control**

Recap: Moving Off & Stopping - Changing Gear

Objective:

- What* How to use the clutch correctly and how it can be used to control the speed of the vehicle at low speeds.
- How* Look at how the clutch works and at the main points of clutch control followed by a demo (if needed) and then on road practice.
- By the end* Be able to operate the clutch smoothly/correctly and maintain very slow speeds by the use of clutch control alone.

Main Points:

What is it? Using the clutch to control the vehicle at low speeds.
How clutch works - Diagram

When to use it? Slow traffic queues - manoeuvres - emerging etc.

How to do it? Biting point - practice finding.
Tiny clutch movements - feel movement of car.
Dual control demo?
